

Renewable Energy Services

Wood Group GTS
Keep on turning

Renewable Energy Services

As a leading independent service provider, Wood Group GTS supports owners of wind farms, both onshore and offshore, by delivering innovative integrated operations, maintenance and asset management services for wind turbines and ancillary equipment.

We're your integrated solutions partner

Our in-depth knowledge of power project management enables us to integrate all support services needed to ensure safe, reliable and cost effective operation of your wind farm. Wood Group GTS has extensive experience in managing wind turbine installation and commissioning, daily facility operations, scheduled and unscheduled maintenance and inventory management. Together with our network of supply chain partners we provide a range of specialized services aligned to your individual wind farm requirements including:

Installation and commissioning support services

Our highly skilled team of field technicians apply their extensive experience coupled with industry leading quality and safety standards to deliver critical support services for your wind turbine installation and commissioning requirements.

Operations and maintenance

Wood Group GTS provides facility staffing, day to day operations and asset management services for any size wind generation facility. We apply established processes and procedures to deliver highly reliable and cost effective operations to wind asset owners and project developers.

Scheduled and unscheduled maintenance

Our experienced professionals deliver field services for an extensive range of wind turbines and ancillary equipment. From semi-annual services to component removal and installation Wood Group GTS provides quality driven maintenance services customized for your wind farms at any location.

Modifications and upgrades

Wood Group GTS provides monitoring and diagnostic system design, implementation and data analysis, retrofit support and component troubleshooting services. This portfolio of services assists you in maximizing the performance of your wind turbines and reduces unplanned downtime.

Inventory management

At Wood Group GTS we have the expertise to implement proven inventory management systems tailored to meet the individual requirements of your wind farm. A Computerized Maintenance Management System (CMMS) operates as a stand-alone function or can be integrated into existing facility processes to create an asset management system that delivers critical facility information in a single user interface.

Focus on QHSE excellence

Wood Group GTS is committed to utilizing safe and environmentally-sound practices, recognizing the safety and wellbeing of all personnel and the protection of the environment. We focus on Quality, Health, Safety and the Environment (QHSE), by ensuring that the following procedures are applied to every wind farm at which we perform work:

- Emergency Response Plans
- Personnel competency and validation processes
- Environmental Management Plans
- HSE Plan in place
- Effective QHSE reporting system
- Waste Management Plan in place

We recognize that our success as a company correlates directly to our ability to deliver services of world class performance standards. Through clear quality objectives, and a consistent execution process, we ensure safe and reliable project implementation and cost effective operation of your generating equipment.

How does your business benefit?

Wood Group GTS provides a wide range of individual and integrated services that can be matched with your unique requirements. Taking a partnership approach, we can integrate our operational, maintenance and facility management capabilities with your resources to efficiently and effectively manage business risks and help you achieve greater predictability of costs and asset utilization.

Where we work

Wood Group GTS can provide support for both onshore and offshore wind turbines including all associated ancillary equipment on a world wide basis.

Choose Wood Group GTS to experience our independent, individual and innovative solutions.

Wood Group GTS is part of Wood Group, an international energy services company with approximately \$5.5 billion sales, employing 36,000 people worldwide and operating in 50 countries.
